## UNIQUE COLLECTION

The most beautiful places in the world are a perfect reminder to remind us how precious our land is, it is up to us to take care of it and to try to preserve its natural wonders.

The fabrics, in the new collection "**Unique**" proposed by CTA®, so called for their beauty and uniqueness, are composed of precious raw materials and new textures which meet the needs of any living environment thanks to its wide range of products with structured textures and with bright tones and pastel colors.

These fabrics are made in full respect for the environment and for the consumer health, they have recycled polyester in their structure which at the same time guarantees high quality standards in terms of appearance, confort and durability.

But not only; among these fabrics we also find the ecological and economic fiber of the future "**Tencel®**". It is made from natural cellulose, obtained from the eucalyptus pulp. This fiber is completely **biodegradable and hypoallergenic**. it prevents the formation of bacteria. **Tencel®** is a durable fabric and can be machine washed like the cotton. In order to preserve the characteristics, a low temperature washing is recommended without the use of softeners.

The use of recycled materials is **GLOBAL RECYCLE STANDARD** certified and promoted by **Textile Exchange**, one of the most important, international non-profit organization for responsible and sustainable development in the textile branch. This standard recognizes the importance of recycling for the growth of a sustainable production and consumption model with the aim of encouraging the reduction of consumption of resources (virgin raw materials, water and energy) and to increase the quality of recycled products.

## ALABASTRO

Alabastro's coast, 130 kms long, located in the Senna Marittima, is a succession of white chalk cliffs, some of which reach the height of 120 meters. It is rich in famous beach resorts, pebble beaches, valleys and fishing villages. Many impressionist painters have been inspired by this fairytale landscape.

**Alabastro** is a leno in 100% PL, a modern and glamour curtain with a checkered structure. It is a fashion inspired quality with matt and gloss - thick and thin twisted yarns. The fusion of so different yarns creates elegant and of great charme combinations. The colorway is developed in 16 metallic colors, ideal for modern architectures. Available in width cm 310/315 with lead.

## AUGUSTA

**Augusta** is one of the most appreciated qualities of the historical CTA' s collection and deserved an updated colorway. Its new range of colors launches it into the future. **Augusta plain** comes from the combination of Linen and Polyester yarns. This combination gives the fabric two very positive qualities: the linen natural melange look but also the advantages of Polyester in creating a smoother and stronger texture. Ideal for decorative curtain, in 50% LI and 50% PL, width cm 325/330, available in 29 colors.

**Augusta Strop** is the crushed version of Augusta plain. A special finishing gives to this quality a playful look. Ideal for decorative curtain in 50% LI 50% PL, width cm 295/300, available in 29 colors.

## CRYSTAL

The Crystal Caves are located in Iceland and they are the main attractions of the nation; they are an absolutely unmissable sight. In visiting them you find yourself surrounded by beautiful and shimmering blue ice walls and it seems to have ended up in a surreal world but here nature is the only creator of such beauty.

**Crystal** is a printed crochet fabric in 100% PL.

It is available in white, natural, grey, wisteria and petrol green color. Width cm 305/310.

## FLAMING

Flaming Cliffs is located in the mysterious and endless Gobi desert, it is a particular rock formation where the first remains of dinosaurs have been discovered.

**Flaming** is a georgette made of 50% PL recycled yarn and 50% PL with a very soft hand and it is available in 23 colors. Width cm 315/320 with lead.

Thanks to its very soft touch, it can be perfectly coordinated with decoration fabrics.

## ICEBERG

Icebergs are masses of ice which break away from polar land glaciers (cause the global warming) and float on the sea.

The currents drag, the enormous floating masses of ice, away from their point of origin to the open ocean where slowly melt in warmer water.

CTA **Iceberg's** fabric is developed with the fil coupé technique on a base of 64% PL 36% CO and characterized by a circle design which creates a play of lights and shadows.

Available in width cm 300 with lead and proposed in 4 colors: white, natural, dove-grau and grey.

## RAINBOW

The Rainbow Mountain is surely one of the most beautiful attraction to visit in Perú, a spectacular mountain of many colors which have been created in a natural way cause of mineral sedimentation on its soil.

**Rainbow** has a natural look with an extremely soft hand thanks to its special calendered finishing.

The fabric looks almost like a linen but it is 88% PL Recycled and 12% PL.

The color's result of this fabric is wonderful in every possible shade and it is presented in 27 trendy colors.

Availabale in width cm 295/300with lead.
