BOTANIC COLLECTION

The new CTA® collection is a fascinating proposal for decorative prints inspired by the world of botany that studies the life forms of plants.

The most complex organisms, studied by Botany, constitute the kingdom of Plants that over time have enticed many researchers in giving life to botanic gardens, considered among the most important green resources for the health of our planet.

The Botanic collection's articles are characterized by alluring ranges of colors with vibrant tones and original motifs inspired by the flora world. In these fabrics we find the expression of perfumes, shades of flowers and plants which transmit joy and warmth making the rooms pleasant and welcoming, ready to embrace the different needs of our customers.

All fabrics are **OEKO-TEX STANDARD 100** certified, a consumer health guarantee and respect for the environment. Furthermore, the presence of recycled cotton is **Global Recycle Standard** certified and promoted by **Textile Exchange**, one of the most important international non-profit organisation for the responsible and sustainable development in the textile industry. This standard recognizes the importance of recycling for the growth of a production model and sustainable consumption with the target of encouraging the reduction of resource consumption (virgin raw materials, water and energy) and of increasing the quality of recycled products.

A wide range of new references that can be coordinated with each other, ideal for various uses and different needs, the result of a choice studied in every details to keep up with the major furnishing trends.
